

An underwater photograph of a swimmer in clear blue water. The swimmer is in the upper right, wearing a blue and orange snorkel mask. Below, a circular pool drain is visible on the pool floor, with a red maple leaf floating nearby. The text 'Eclipse™ Drain' is centered in the middle of the image, with 'Eclipse' in black and 'Drain' in blue. Below it, the tagline 'Redefining Pool Drains' is written in black. At the bottom, the 'BLUE SQUARE' logo is displayed in a dark blue and white box.

Eclipse™ Drain

Redefining Pool Drains

B L U E S Q U A R E

**Remove
Large
Debris
with Beauty
and Ease**

Before you see the Eclipse™ Drain, the debris is gone!

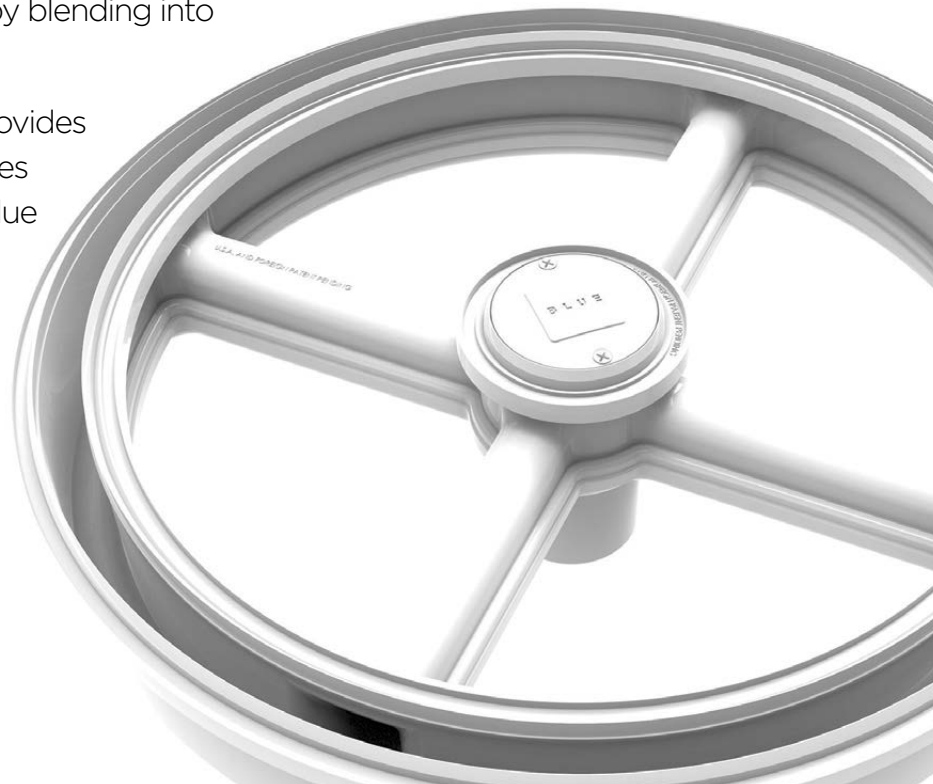

Blue Square brings together style and functionality to redefine the pool drain!

Why should your cleaning system be the ugliest part of your swimming pool. The patented Eclipse™ Drain* virtually disappears into the surface of your pool. Blue Square is changing the way the industry looks at drains and debris removal systems!

A unique, sleek circular design, the Eclipse™ virtually disappears in the floor of your pool by blending into any pool surface.

The revolutionary circular channel provides maximum flow and efficiently removes debris. Use in conjunction with the Blue Square In-floor System and Abyss™ Canister to maximize performance!

** The Eclipse™ Drain is VGBA Compliant™
"Single Source Suction"*

The most advanced drain on the market

- Blends into any pool surface making it virtually invisible
- Single Source Suction
- Circular design fits any pool shape and style
- Meets all industry anti-entrapment safety regulations
- Compatible with 2" or 2 1/2" plumbing
- Made in the USA
- Easy access portal
- Optional Hydrostatic Valve for high water tables
- No stubbing toes
- Flush design, robot cleaners won't get stuck
- Comes in two colors, White and Gray
- Great for spas and catch basins
- Max allowable pulling power*

**VGBA & ANSI
16 Compliant
as a single source
unblockable
drain.**

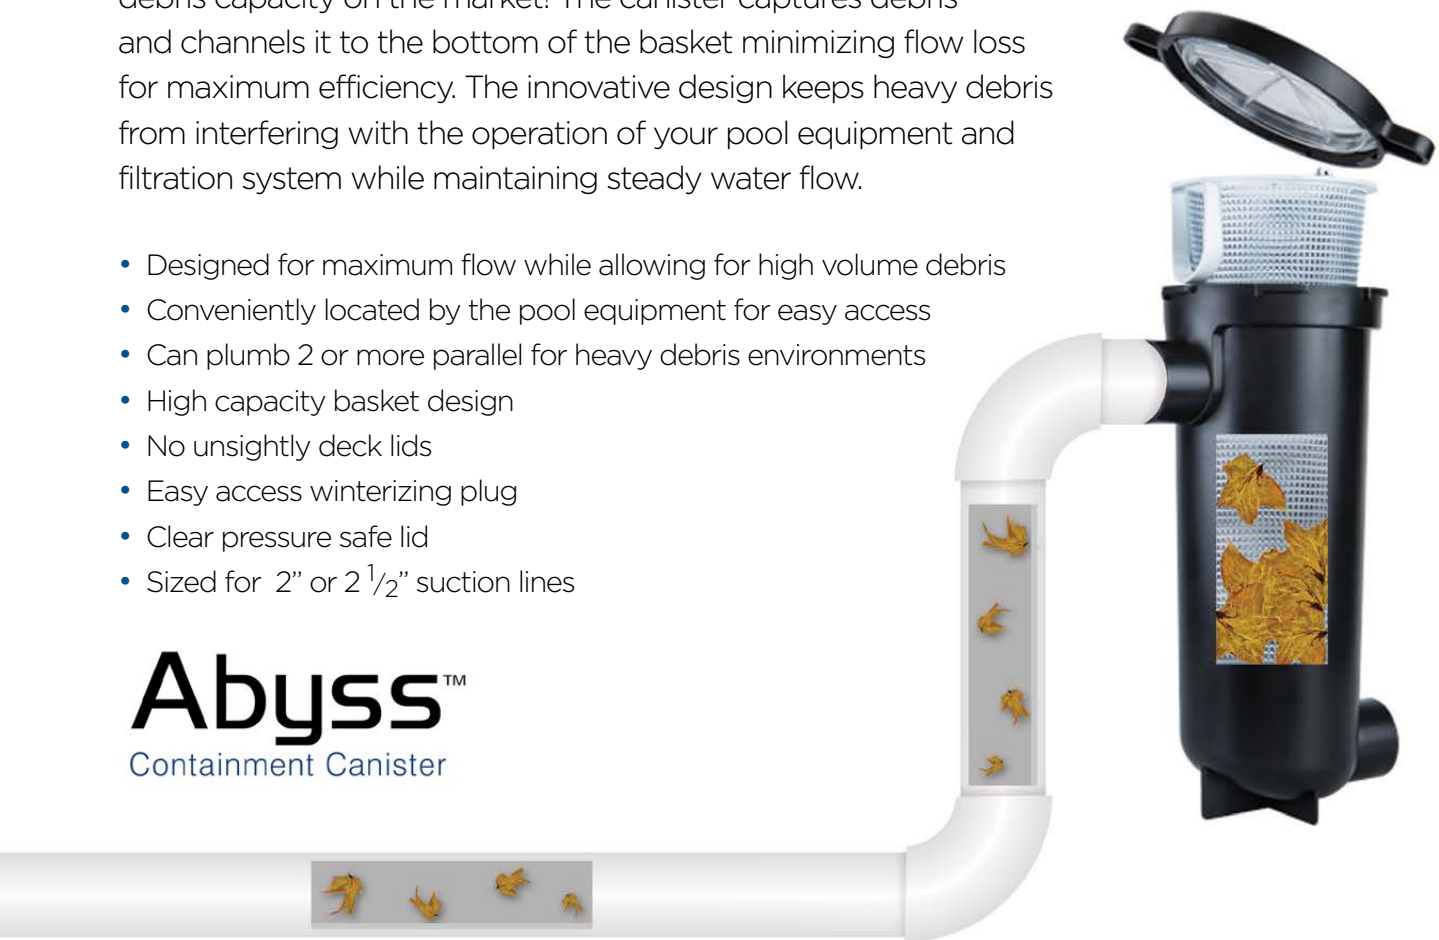

*157 GPM @ 1/2 foot per sec ANSI 16

Combine with the Abyss™ Canister to maximize performance

The Abyss™ Containment canister's innovative design provides the largest debris capacity on the market! The canister captures debris and channels it to the bottom of the basket minimizing flow loss for maximum efficiency. The innovative design keeps heavy debris from interfering with the operation of your pool equipment and filtration system while maintaining steady water flow.

- Designed for maximum flow while allowing for high volume debris
- Conveniently located by the pool equipment for easy access
- Can plumb 2 or more parallel for heavy debris environments
- High capacity basket design
- No unsightly deck lids
- Easy access winterizing plug
- Clear pressure safe lid
- Sized for 2" or 2 1/2" suction lines
