Investment

HELIOCOL
SOLAR POOL HEATING. ENGINEERED FOR LIFE.

Rapid Payback

Commercial Heliocol systems typically pay for themselves in less than 3 years, are maintenance-free, require zero additional maintenance cost and have a life expectancy of 20 years. On average, a 100-panel system will save 2,400 gallons of LP fuel per month.

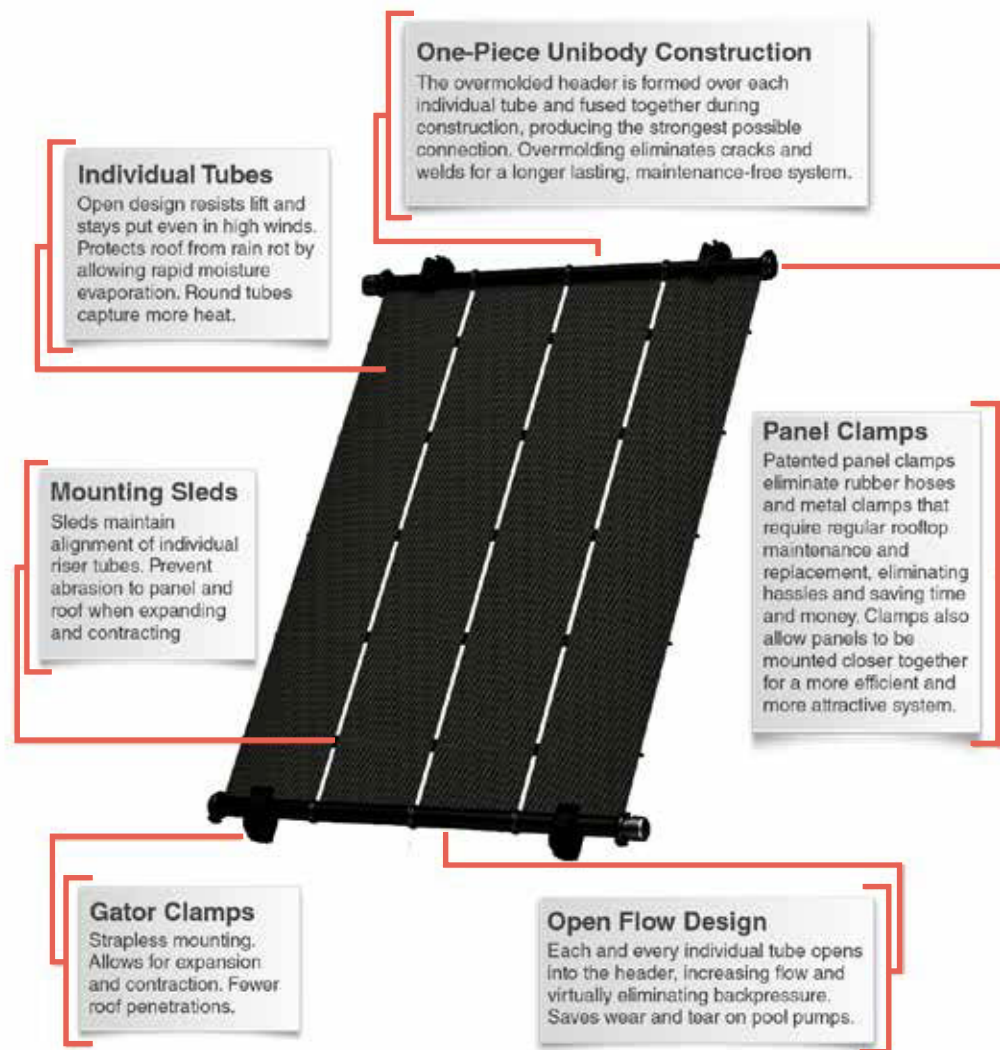

Warranty Leadership

Heliocol leads the solar industry with unsurpassed commercial investment protection. Warranties include panels, labor, parts and freeze protection. This extensive and unprecedented warranty has been serviced for more than 20 years.

Professional Design and Installation

Heliocol's worldwide network of solar professionals assure you a quality, well-engineered and worry-free installation from start to finish. A free performance and investment analysis will show just how much a Heliocol solar pool heating system can save your organization year after year.

Heliocol's Patented Design Features

Experience and Certifications

- Heliocol is the world's largest solar pool heating manufacturer and has maintained continuous production of its collectors since 1977.
- Heliocol was the first solar collector to receive ISO 9001 certification for quality management and has maintained that certification each year since 1998.
- Heliocol is the only solar pool heating system certified ISO 14001, which meets not only quality control standards, but environmental standards.
- Heliocol is NSF-50 listed by the National Sanitation Foundation, ensuring the safety and durability of its products for use in public or commercial swimming pools, spas and other recreational water facilities.
- Heliocol supports the Buy American preference and supplies products that are ARRA compliant.
- Heliocol is additionally certified by SRCC, and FSEC.
